01 PROFILE

Full-stack developer with **4+ years** building enterprise applications on **.NET and SQL Server**, now shipping **Angular + ASP.NET Core** features for hospitality software at Agilysys. Strongest in the data layer (query tuning, stored procedures, ETL) and comfortable across the stack, from REST APIs to responsive, accessible UI. *I like understanding how things work, then making them work better.*

02 EXPERIENCE

Agilysys · Software Analyst

Dec 2025 – Present · Chennai

C# · ASP.NET Core Web API · Angular · TypeScript · SQL Server · Azure DevOps

- Build features end to end for Agilysys hospitality software: **Angular** front end, **ASP.NET Core Web API** and **SQL Server**.
- Develop RESTful APIs in C#: controllers, services, DTOs, validation and centralised error handling, with Entity Framework Core for data access.
- Build Angular components, services, routing and reactive forms in TypeScript that consume those APIs.
- Write and tune SQL Server queries, stored procedures and schema changes behind new features.
- Work in an Agile team on Azure DevOps and Git: pull requests, code reviews, debugging and refactoring.

Infosys · Technology Analyst

Apr 2022 – Dec 2025 · Coimbatore

C# · .NET Framework · ASP.NET · SQL Server · Oracle · PL/SQL · SSIS

- Engineered and optimised enterprise-scale SQL databases, improving query performance by **30%**.
- Developed and maintained .NET (C#, ASP.NET) applications and web services integrated with SQL back ends.
- Reduced manual processing by **40%** with stored procedures, triggers and functions that automated recurring work.
- Supported large-scale data migration and transformation with SSIS ETL workflows.
- Prototyped AI-assisted workflow automation that cut turnaround time by **20%**; delivered **95%+** of work on time with cross-functional teams.
